

The Platform Solutions Remote Series ePolicy Orchestrator 1 Day Upgrade - 4.0 to 4.5

PLATFORM SOLUTIONS

Platform Solutions 1 Day McAfee ePolicy Orchestrator Upgrade program is designed to save you time and money. The time savings is evident because you will have access to a Platform Solutions security engineer that is McAfee certified with a background in information technology and countless years of ePO consulting services experience. The cost savings to you is measurable because you don't have to worry about any travel or expenses. Our engineering team works for Platform Solutions and is not contracted by a third party.

Platform Solutions will work with your team to upgrade your ePolicy Orchestrator version 4.0 to 4.5 in one day. This is done remotely, on a secure connection, to your ePO server. This one day program is uniquely designed to watch costs and provide you the resources to get the job done. Attention to the following items will take place during this one day remote upgrade.

- Installation prerequisites
- The upgrade process and what is entailed
- Introduction to the new ePO server
- Ensuring ePO information has been retained post upgrade
- How to manage and deploy McAfee applications
- How to configure the new System Tree
- Configuration of tag criteria and system tree sorting
- Configuration of full active directory and NT domain synchronization
- Introduction to the new reporting section and creating your own reports
- Scheduling and e-mailing reports
- Configuration of the system compliance tasks
- Configuration of new users and permissions
- Configuration of the dashboards
- Introduction to Active Directory Synchronization

Before you decide, give us a call to discuss further. A Platform Solutions security consultant will ask you a few questions regarding ePO, your server and the clients you manage.

About Platform Solutions Training Services

Whether you are looking for in-depth technical training or personnel development courses, Platform Solutions offers a broad range of training solutions to meet your needs.

Our trainers can help you navigate our diverse course book, or help you customize a class to meet your specific requirements. We offer flexible classroom, remote and on-site delivery methods that can be formulated to work within the needs and budget of your organization.

The Platform Solutions Advantage *We Take IT Personally*

When you work with Platform Solutions, you work with a team. People you know....people who earn your trust. You have a dedicated account manager and technical team – and you'll have all their numbers. No bait and switch. No push off to inside sales. We hang our hat on customer success – and take IT very personally.

Platform Solutions specializes in designing, implementing, managing and optimizing solutions for your network and application infrastructure. From security and unified communications to virtualization and data center, we have exceptional practical knowledge and real-world experience, backed by third-party certifications.
