

The Platform Solutions Remote Series

ePolicy Orchestrator 2 Day QuickStart

PLATFORM SOLUTIONS

Platform Solutions will work with your team to implement ePolicy Orchestrator into your business. This accelerated program is uniquely designed for those watching your pennies and don't have the resources to get this application running. This goal is accomplished with experienced security engineers who have a proven track record. They are certified by McAfee and have been working with ePO since its inception back in the late 90's.

This 2 day QuickStart establishes a pilot program with a baseline transfer of ePO knowledge. In order to maintain your bottom line, this is done entirely through a secure remote connection as we collaborate with you the entire way. Here is what our program does for you:

- We configure and test the technology with a pilot ePO deployment customized to your requirements.
- Install and configure ePO software on one Microsoft® Windows® server
- Deploy ePO McAfee agents to the pilot systems
- Test ePO software agent distribution method on your systems (up to eight workstations running McAfee® VirusScan® and up to two file servers running VirusScan and/or McAfee Antispyware Enterprise)
- Test virus detection policy enforcement on your systems where agent is installed (eight workstations and up to two file servers)
- Configure ePO to provide centralized reporting for installed McAfee products, VirusScan 8.7i and/or McAfee Antispyware Enterprise
- Configure ePO to receive and distribute
 - Automatic DAT file updates
 - Regular product updates
 - Engine updates
- Configure ePO to enforce customized desktop security policies
- Configure ePO to provide emergency updates
- Rollout production implementation using real world scenarios
- Transfer of knowledge to designated team member

About Platform Solutions Training Services

Whether you are looking for in-depth technical training or personnel development courses, Platform Solutions offers a broad range of training solutions to meet your needs.

Our trainers can help you navigate our diverse course book, or help you customize a class to meet your specific requirements. We offer flexible classroom, remote and on-site delivery methods that can be formulated to work within the needs and budget of your organization.

The Platform Solutions Advantage

We Take IT Personally

When you work with Platform Solutions, you work with a team. People you know....people who earn your trust. You have a dedicated account manager and technical team – and you'll have all their numbers. No bait and switch. No push off to inside sales. We hang our hat on customer success – and take IT very personally.

Platform Solutions specializes in designing, implementing, managing and optimizing solutions for your network and application infrastructure. From security and unified communications to virtualization and data center, we have exceptional practical knowledge and real-world experience, backed by third-party certifications.
